Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 15 January 2009 has been entered.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:
Re. claims 4, and 8: The limitations of "an energizing electrode pad disposed on a first surface of the magnetic head part on a side opposite from the conductible support" in addition to "the second pole being electrically connected to the arm member, the second pole entering the conductible support through the second surface of the magnetic head part and exiting the conductible support through a surface in direct contact with the arm member" cannot be expressly found in the prior art. While there are prior art references such as Rancour et al. (US 6,757,135 B2) which teaches an energizing electrode pad disposed on an opposite side to another energizing electrode pad, it would not have been obvious to change the electrical connection structure to the claimed electrical structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2627

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
